Ahmed Farid

Senior Software Engineer — Real-time, multi-tenant SaaS · End-to-end product engineering

Dubai, United Arab Emirates · ahmed@iamahmedfarid.com · iamahmedfarid.com · linkedin.com/in/iamahmedfarid · github.com/ahmedfarid2

SUMMARY

I take systems end to end — schema, API contracts, web and mobile interfaces, infrastructure and production delivery — focused on real-time, multi-tenant SaaS where state must stay correct under load: live auctions, debt-recovery pipelines, payment and KYC flows. Laravel and Next.js at the core, Flutter for mobile, production AI (RAG, multi-LLM gateways) where it earns its place. Arabic/English RTL, for teams across the Gulf, US and UK.

27+ products shipped · **17+ countries** · **12+ apps on App Store / Google Play** · **13+ white-label pharmacy brands**

SKILLS

BACKEND	Laravel · PHP · Node.js (Express, NestJS) · Python (FastAPI, Django) · REST API design · queues & jobs
FRONT & MOBILE	Next.js (App Router, SSR) · React · TypeScript · JavaScript · Tailwind · TanStack Query · React Native (Expo) · Flutter (BLoC) · store releases · RTL / i18n
DATA & CLOUD	MySQL · PostgreSQL (pgvector) · Redis · MongoDB · AWS (EC2, RDS, S3) · Docker · GitHub Actions CI/CD · Nginx · Cloudflare
SYSTEMS	Multi-tenant SaaS · real-time (WebSockets, Laravel Reverb, Socket.IO) · event-driven sync · RBAC · SSO (OAuth 2.0 / OIDC)
AI	RAG · multi-LLM gateways (OpenAI, OpenRouter) · tool calling · AI features inside production products

EXPERIENCE

Recovery Advisers — Senior Software Engineer **Jul 2025 – Present**

Dubai, UAE · Full-time, remote · Owns architecture, schema, API contracts and production delivery

- Multi-tenant debt-recovery platform, six-stage lifecycle; role-based access enforced at the data layer, not in the UI.
- Replaced polling with event-driven webhook sync to client environments; per-case sequence numbers keep mirrored state from moving backwards on late or duplicated deliveries.
- Isolated client portal for creditors and law firms, and RAS Mobile, the team's iOS / Android app with an offline write queue; SSO via Microsoft Entra ID (OAuth 2.0 / OIDC). Laravel 13 (Octane, Reverb) · Next.js · React Native (Expo) · MySQL

Independent Consultant — Senior Software Engineer **Jan 2022 – Present**

Freelance, remote · Clients include Qoralia, Khebra, Phonic Maps, Ibdaa Course, Applyni, Proven Management, Ezhal, Alnaimi Studios

- **Qoralia** — AI-assisted decarbonization planning: the model surfaces candidate grants, deterministic scoring decides eligibility, the UI shows which rule decided. FastAPI · React · PostgreSQL + pgvector
- **KhebraOS** — Arabic-first academy platform, a branded school per tenant; RTL from the first component, AI course generation. React 19 · Express 5 · PostgreSQL
- **Phonic Maps** — multi-tenant location and review management: Google Business Profile sync, AI-suggested review replies, per-location auto-reply rules. Laravel 12 · Next.js 16 · PostgreSQL · Redis
- **Ibdaa Course & Applyni** — an Arabic-first LMS and a Saudi AI career agent, built end to end for one founder. Laravel · Next.js

Yelo Sale — Senior Software Engineer **Jun 2024 – Aug 2025**

Saudi Arabia · Full-time, remote

- Real-time B2B2C vehicle auction where the server decides bid order: Redis atomic increments broadcast over Socket.IO — sub-200 ms bid-to-broadcast, no lost bids or duplicate winners under final-second load.
- Server-side proxy auto-bidding; one Laravel 11 API for a Next.js 14 web app and Flutter iOS / Android apps live on both stores (Nx monorepo, Arabic/English RTL).
- Payfort checkout, OTP/KYC, PDF/QR invoicing, Dynamics 365 ERP sync, inventory state machine. Docker · GitHub Actions · AWS

Shorter engagements **2024**

- **Arab Bank** — Software Engineer, Cairo, on-site (Mar – May 2024): backend services and APIs for digital banking.
- **Interactive Future** — Software Engineer, Saudi Arabia, freelance (Jun – Dec 2024): full-stack work on travel-technology platforms.
- **almentor** — Software Programming Instructor, freelance (Jun – Nov 2024): taught and code-reviewed backend, frontend and database work.

RevealSite — Software Engineer **May 2023 – Mar 2024**

United States · Full-time, remote

- One white-label, multi-tenant codebase serving 13+ pharmacy brands in the US and UK — Flutter patient apps and React storefronts, each with its own branding and configuration.
- Refills, transfers, booking, reminders and two-way messaging; automated fax/email request routing with Django and Celery.

Compass Med — Software Engineer & Art Production Director **Aug 2021 – Dec 2023**

Cairo · Part-time, hybrid · Built the dental e-commerce platform: Odoo ERP, wallet & coupons, shipping automation

OWN PRODUCTS

ReconcilePilot (invoice ↔ bank reconciliation) and **SheetPilot AI** (CSV to AI-written business report). Next.js 16 · Supabase

EDUCATION & LANGUAGES

B.Sc. Computer Science & Artificial Intelligence — Helwan University, Cairo · 2019 – 2023 Arabic (native) · English (professional)
